Performance Dashboard

A real-time view of key metrics, trends, and operational health – designed to help product managers and executives make faster, smarter decisions.

At a Glance: Key Metrics

Four headline KPIs define the health of the business at a glance. Each metric is tracked in real time, with color-coded status indicators that surface what needs attention and what's performing well.

\$2.4M

Total Revenue

Up 18% vs. last period

74%

Customer Retention

Stable, above industry avg.

12.3K

Active Users

Reliability SLA maintained

REVENUE

Revenue Trends Over Time

Consistent Growth Against Target

Revenue has outpaced the target line for five of six months, with June showing the strongest performance at **\$255K** – 16% above the \$220K target. The slight dip in April warrants monitoring but did not break the overall upward trajectory.

- ✓ June revenue exceeded target by \$35K – best month on record.

User Engagement Breakdown

Where Users Are Most Active

Mobile App leads engagement at **39%** of total active users, followed by Web Platform at **29%**. API Integrations represent a growing enterprise segment at **17%**.

- Mobile-first strategy is paying off – highest growth channel
- API usage signals strong B2B adoption
- Desktop remains a niche but loyal segment

Customer Retention by Segment

Enterprise Leads, SMB Needs Attention

Enterprise customers show exceptional loyalty at **91% retention**, while Startup segment churn is a concern at only 58%. Targeted onboarding and success programs could close this gap.

 **Enterprise: 91%**

Dedicated CSMs driving loyalty

 **Startup: 58%**

Early-stage churn risk – intervention needed

System Health & Uptime

Approaching 100% Reliability

Uptime has improved steadily over six weeks, crossing the **99% SLA threshold** in Week 3 and holding above it since. Week 6 peaked at **99.7%** – just 0.3% from perfect uptime.

- Three consecutive weeks above SLA target signals strong infrastructure stability.

What the Data Is Telling Us

Revenue Momentum

Outpacing targets for 5 of 6 months – growth strategy is working.

Mobile Dominance

39% of users on mobile – double down on app experience.

Startup Churn Risk

58% retention in Startup segment needs proactive intervention.

Infrastructure Strong

99.7% uptime – reliability is a competitive advantage.

Performance Across Customer Tiers

	Enterprise	Mid-Market	SMB	Startup
Retention Rate	91%	78%	65%	58%
Revenue Contribution	High	Medium-High	Medium	Low
Support Needs	Low	Medium	High	High
Growth Potential	Medium	High	High	Very High

Each Segment Has a Different Profile

Enterprise delivers the highest retention and revenue but requires less support. Startup and SMB segments show strong growth potential but need more hands-on investment to reduce churn.

- **Enterprise:** High value, low churn, low support cost
- **Mid-Market:** Balanced profile with strong growth
- **SMB:** High support needs, moderate retention
- **Startup:** Highest growth potential, highest churn risk

STRATEGY

Priority Actions for Next Quarter

1 Launch Startup Retention Program

Deploy targeted onboarding, in-app guidance, and a dedicated success track to lift Startup retention from 58% toward the 75% benchmark.

2 Accelerate Mobile App Investment

Mobile drives 39% of engagement – prioritize feature parity, performance optimization, and a refreshed UX to capture growing demand.

3 Expand API & Enterprise Offerings

API usage signals strong B2B demand. Package enterprise-grade integrations and SLAs to convert high-intent API users into paid accounts.

Key Takeaways

1

Revenue is accelerating

\$2.4M total, outpacing targets – momentum is strong heading into Q3.

2

Mobile and API are the growth engines

Together they represent over 56% of active engagement.

3

Startup churn is the biggest risk

A focused retention program could unlock significant recurring revenue.

4

Infrastructure is a strength

99.7% uptime is a differentiator – communicate this to enterprise prospects.
